

# *Front End Web Developer*

## *Overview*

**Location:** Soho, London

**Role:** Front End Developer

**Hours:** Full Time

**Level/Experience:** 3+ years of relevant industry experience, with a demonstrable portfolio of published work for agency clients

## *Job Description*

This role requires a talented and flexible front end developer who has real passion, flair and commitment to developing attractive, functional and fully compatible websites and digital applications.

The ideal candidate will be hungry to work on a variety of projects across an interesting mix of clients. They will be able to deliver under pressure and to tight deadlines and will be naturally collaborative. They will also have a natural interest design and the latest digital trends and technological advancements.

Based in central London, you will be joining an exciting, dynamic digital agency with a growing team of creatives and developers working in a relaxed and professional environment on a range of interesting and challenging projects.

## *Skills*
